

## PLAY EDUCATE GROW

## Laidlaw School Community Green Space Revival

Dear Community Member,

We are reaching out to you in hopes that Laidlaw School holds a special place in your family's journey. The school recently celebrated their 50-year anniversary and it's evident that the yard is in need of some tender loving care. As you can appreciate, projects like this require the community's involvement to see that it gets done. We know that the community of Tuxedo is capable of this.

The Laidlaw Parent Advisory Council Play Educate and Grow (PEG) Committee is embarking on this project to improve the school's outdoor space. Our dreams for our children's play area are big! We hope to turn a blank space into an area that will be enjoyed by our students and community members for years to come. Our project includes renovated soccer fields, the purchase of new soccer nets, adding hills for winter fun, adding a Fit Zone with new playground equipment including swings. We also hope to be adding a stage, and an outdoor classroom for creative use both during class and recess time.

With big dreams comes the need for big support. Our budget for the entire project is \$390,000. We plan to carry this project out in phases, beginning with phase 1 this summer! Between grant funds and school fundraising, we've raised \$132,000, we need just \$43,000 to complete phase 1. The financial support of community family/business members is much needed.

Whether you had a child, grandchild, niece/nephew attend here or your loved ones have enjoyed our outdoor space, we know you are connected to what our school embodies and hope you will consider being a part of something great. Please consider leaving your family's mark and giving a donation. Your support is greatly appreciated.

*Our school has a small community but a big heart.*

Thank you for your thought & consideration,

The Laidlaw PEG Committee

Building a Laidlaw Legacy for Learning and Sports

At Laidlaw School, our students have big dreams for a new outdoor space. We have big dreams too because we know that outdoor play is vital to learning. We have an existing play structure but the rest of the yard is just a blank space. We hope you will join in contributing a generous gift that will make these dreams a reality.
